DEVOPS: CI/CD, Ansible, Docker

WORK EXPERIENCE

THOUGHTWORKS

Bangalore, India

Application Developer

Aug '15 – July '17

- Developed software applications using Agile software development practices such as Test-Driven Development, Pair Programming, Continuous Integration, and Continuous Delivery.
- Portfolio Management Application
 - Developed responsive web and mobile applications (iOS and Android) along with backend REST services.
 - Automated the deployment process and optimized the time to deploy which ensured reliable deployment.
- Asset Management Platform
 - Designed and developed the asset management platform using Node.js for the Kroger web applications.
 - Used GIT to store and version the assets and deployed the asset repository using Docker.
- Car-Pooling Application
 - Developed application to match cab mates and to provide the best route to travel using Ruby on Rails.
 - Used Okta for authentication and Go-CD for Continuous Delivery of the project.

IBM ISL (India Software Labs)

Bangalore, India

Application Developer - Intern

Jan '15 - July '15

- Developed difference editor for Rational Team Concert (RTC) Visual Studio client.
- Designed and implemented theme adaptable widgets for RTC Visual Studio client using WPF and C#.

ACADEMIC PROJECTS

Open Source Software: Mozilla Servo

Oct '17 – Dec '17

- Implemented mutation testing framework to evaluate quality of web platform tests using Python.
- Automated various mutation strategies to produce bugs in source code.
- Introduced test mapping framework to efficiently run tests against the mutants.

Application for Karnataka State Fire and Emergency Services

Apr '14 – Oct '14

- Remodeled the unstructured and real-time data from fire department for facilitating data analysis and data visualization.
- Devised a web application to visualize fire hazard pattern for aiding the personnel in effective deployment of services.

Online Teacher's Appraisal System

July '13 – Nov '13

- Developed ASP.NET web application for conducting and compiling the appraisals along with generating rating-report for the faculty of the college.
- Designed generic college database compatible with various college applications using SQL server.

Android Application for Visually Impaired

Feb '13 – Apr '13

- Created visually impaired-friendly controls to access basic functionalities of the Android phone.
- Developed text-to-speech and speech-to-text synthesizers for input and output operation.
